ABOUT US

Challenging deadlines and complex problems?

You've come to the right place.

Since 1975, HJ Machine and Pattern has been manufacturers' reliable supply chain partner. We bring our experienced hands, creative minds and proven history of on-time delivery to help you solve your most challenging manufacturing problems.

We'll help you be more efficient and improve quality with test fixtures, jigs, molds, patterns and tooling ... custom-made and defect-free.

We know that high quality design, product and service, offered at a competitive price, is your top priority. Ensuring you receive it, is ours.

With over 425 years of combined experience, our expert team specializes in the foundry/metal working and automotive fluid handling manufacturing industries.

HJ Machine and Pattern is ISO 9000-2015 certified and a CAMSC certified minority-owned company. From our IT infrastructure, to ERP, to continuously improving our processes, we embrace innovation in everything we do. Operating out of our 8000 sq. ft. Waterloo facility, we've recently partnered with the University of Waterloo to further integrate the latest in technology into our products.

OUR APPROACH TO QUALITY

At HJ Machine and Pattern, we strive for excellence that sets us apart from competitors. Our goal is to be known as the most reliable supply chain partner in the industries we serve.

- We take the time to truly understand your requirements.
- Our products will meet or beat your quality requirements.
- We aim to reduce lead time and have 100% on-time delivery.
- Every HJ Machine and Pattern team member participates in ensuring quality.
- Our products meet statutory and regulatory requirements.
- We commit to continuous improvement.
- We operate in a safe and responsible environment.

HJ Machine and Pattern is ISO 9001:2015 certified.
